## Montana Data Use Conference

----*Pathway to a Data Use Culture in Montana*----

May 10th, 2016 | Bozeman, Montana

# Montana Office of Public Instruction Data Use Conference

*Pathway to a Data Use Culture in Montana*  
May 10th, 2016 | Bozeman, Montana

Participants will hear from state researchers, university faculty and invited guests about the education data currently being utilized at all levels for educational practice in Montana. Emphasis will be placed on future directions of data use. Sessions will be held on the importance of understanding the different data systems in Montana, the significance of quality data, the importance of data privacy, predictive analytics and the state of student assessments

## Objectives

- Understand different data sources and uses.
- Use technology to access and download data.
- Develop a collaborative data use culture.
- Develop best practices.

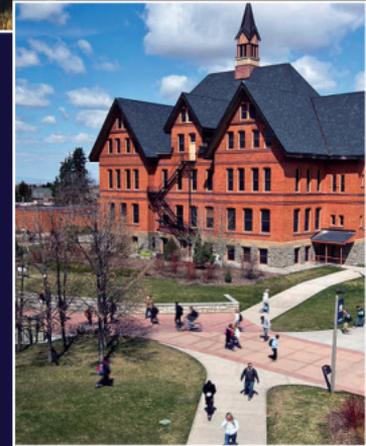

## Who should attend?

Anyone with an interest in education data from pre-K through post-secondary—Superintendents, school administrators, teachers, board members, university faculty/staff, university students, local education agency staff, state education agency staff, IT/technical staff and directors.
